

## Regulatory and Legislative Tracking Reports for Vehicle Manufacturers and Suppliers

Since 1999, **Kardos & Associates LLC** has supplied the auto industry with the most comprehensive regulatory and legislative tracking reports available. We currently offer clients the following:

### **Motor Vehicle Safety & Emissions Regulatory Update (the REG UPDATE)**

The **REG UPDATE** has been tracking US and Canadian regulatory activity impacting the auto industry for over twenty years. Regulations developed by the NHTSA, FMCSA, EPA, FCC, CARB, Transport Canada, and Environment Canada are the focus. For each rulemaking, the **Reg Update** provides a description of the rulemaking, comment deadlines, effective dates, a docket reference, and links to documents available online. Deadlines and critical path items are color-coded so that you can quickly identify what's new and important. In addition to being an excellent tool for tracking regulatory activity, the **Reg Update** is a great archive of past actions. The report contains information on virtually every rulemaking affecting automakers from the past two decades. Approximately 400 pages in length.

### **U.S. Safety & Fuel Economy Regulatory & Legislative Update**

The **U.S. Safety & Fuel Economy Regulatory & Legislative Update** provides a snapshot of the past month's legislative and regulatory activities relating to safety, emissions and fuel economy. The report provides brief summaries of notices issued by DOT, EPA, CARB and others. With regard to federal legislation, the report covers newly introduced bills, information on committee hearings, etc. Activities at the state level pertaining to emerging technologies (e.g., automated vehicles, advance driver assistance systems, EVs and EV infrastructure, etc.) are also covered.

### **Federal Legislation Tracking Report**

Our legislative tracking report focuses on matters relating to environment and energy, safety and fuel economy/climate change. The report covers two years-worth of bills (the length of each Congressional session) and includes summaries and status updates for each tracked bill. Links to bill text and related information are provided.

All of our reports are distributed monthly via email as a PDF. Subscribers also get access to an online archive of past reports.

For pricing, contact Dale Kardos at (202) 3064997 or [dale.kardos@motorvehicleregs.com](mailto:dale.kardos@motorvehicleregs.com). For more information about Kardos & Associates LLC, see [www.kardosllc.com](http://www.kardosllc.com).
